

Just pick up and go – real portable power

The F2.5 is a perfect way to get out and enjoy the water, turning even the shortest boat rides into enjoyable adventures.

Inside a streamlined shell, this 4-stroke outboard is packed full of pioneering Yamaha technology. And it packs a punch too –always providing enough power to get you where you want to go. Superb handling, manoeuvrability and reliability on the water come as standard, along with user-friendly controls and low-vibration performance.

The large, comfortable carry-handle makes the F2.5 genuinely portable and a pleasure to use –and adds a new dimension to small boat adventures. It also makes the ideal auxiliary engine for discerning yacht owners.

- ▶ Easy-to-use side gear shift selector
- ▶ F-N (Forward-Neutral) gears for easy control
- ▶ 360° steering makes manoeuvring a pleasure
- ▶ Strong, light handle for comfortable portability
- ▶ Integral fuel tank built-in for convenience
- ▶ Strong full sized tiller handle with twist-grip throttle
- ▶ Steering friction adjustment for manoeuvrability
- ▶ Inspection window for quick and simple oil check
- ▶ TCI Ignition System for reliable performance
- ▶ Auto decompression for easier starting
- ▶ Thermostatic water-cooled engine
- ▶ Blow-by gas re-burning system

Technology the world trusts

Whether you're a recreational boat owner or a busy professional, choose the engine that will help you get more out of your boat.

Every engine in the Yamaha range uses the latest Yamaha marine technologies, engine layouts and ingenious intake and exhaust systems. Yamaha's 4-stroke development has been so successful because, rather than just adapting ordinary automotive engines for the water, we design and build our marine-specification 4-strokes from scratch.

And, without compromising on power, performance or usability, our specially designed marine engines also help preserve the environment through the use of pioneering clean-burn technologies.

**360° steering**

Take the F2.5 on to the water and you'll soon appreciate how wonderfully agile it is. Full 360° steering offers exceptional manoeuvrability, making it that much easier to get into tight spots. This also means full reverse thrust is always available without ever having to shift gears.

Built-in fuel tank

To really get out there, you need to know you've got room for all the necessary gear, whether that's an extra box of bait, or an extra cooler of refreshments for you and your friends. To give you more space inside your boat, the F2.5 has a built-in fuel tank, eliminating the need for an external equivalent.

**Strong full size tiller handle with twist-grip throttle and integrated cables**

The F2.5's strong tiller handle, featuring a large and comfortable twist-grip throttle, allows easy control of the engine, while the side-mounted shift selector is also very convenient to use. The result is superb handling and manoeuvrability. The kill switch and throttle cable are integrated into the design.

Steering friction adjustment

You'll find the F2.5 incredibly easy to handle, thanks to its convenient controls for steering friction and throttle adjustment. This allows both steering and throttle to be easily adjusted when you're out on the water and provides great stability and control, even at higher speed.

**Strong propeller and shaft**

In keeping with its tough and rugged construction, the F2.5 has a 3-blade alloy propeller secured to the strong gearbox shaft by a locking nut.

Yamaha's Ideal Anti-corrosion Protection

You need an engine you can rely on. Yamaha outboards are renowned for their durability and how well they hold their value. While a unique YDC-30 aluminium alloy protects the engine's exterior parts, a zinc coating, high-quality stainless steel, and 5-stage exterior coating offer long-lasting protection – inside and out.

Engine

Engine type	4-stroke
Displacement	72 cm ³
No. of cylinders/configuration	1,0HV
Bore x stroke	54.0 mm x 31.5 mm
Prop shaft output at mid range	1.8kW / 5,500 rpm
Full throttle operating range	5,250 - 5,750 rpm
Lubrication system	Splash
Carburettors	1 carb.
Ignition / advance system	TCI
Starter system	Manual
Gear ratio	2.08 (27/13)

Dimensions

Recommended boat transom height	S:432mm L:559mm
Weight without propeller	F2.5AMHS: 17.0 kg, F2.5AMHL: 17.0 kg
Fuel tank capacity	0.9 litres (Built-in fuel tank)
Oil pan capacity	0.4 litres

Additional features

Steering	Tiller handle
Throttle and shift controls	Tiller handle
Trim & tilt method	Manual (0°,4°,8°,12°)
Lighting Coil / Alternator	-
Propeller	Included
Remark	The kW data in this sheet is based on the ICOMIA 28 standard, measured at the prop shaft

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®. Yamalube® is our own range of high-tech lubricants, the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you ride.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative boating gear. An extensive range of casual wear is also available. For more information go to:
