

Take a fresh look at our lightweight heavyweights

Packing power on the water doesn't have to mean dragging a bulky, heavy outboard onto your boat because the lightweight F8 and F9.9 are perfectly portable. Their comfortable-to-use, integrated carrying handles help too.

Discover the joys of whisper-quiet operation and excellent fuel economy, blended with smooth, reliable power and impressive torque. Yamaha's CDI Ignition System ensures reliable, first-time start-up, so with the twist-grip throttle and F-N-R gear system, it all adds up to easy, safe handling.

These are engines with many talents, making them ideal for tender duties, for short fishing or family expeditions – or if you use your boat as a reliable work partner.

- ▶ NEW: Ergonomic shift lever & tiller handle (F9.9)
- ▶ NEW: Larger handle for easy carrying (F9.9)
- ▶ NEW: Convenient vertical storage position (F9.9)
- ▶ Compact and efficient engine design
- ▶ Reliable power and impressive torque
- ▶ Lighting coil fitted as standard
- ▶ Single-action steering friction (F9.9 Tiller spec)
- ▶ Fresh water flushing system
- ▶ Shallow Water Drive for cruising close inshore
- ▶ Over-rev limiter
- ▶ Start-in-gear' protection system
- ▶ Low Oil Pressure warning

Technology the world trusts

Whether you're a recreational boat owner or a busy professional, choose the engine that will help you get more out of your boat.

Every engine in the Yamaha range uses the latest Yamaha marine technologies, engine layouts and ingenious intake and exhaust systems. Yamaha's 4-stroke development has been so successful because, rather than just adapting ordinary automotive engines for the water, we design and build our marine-specification 4-strokes from scratch.

And, without compromising on power, performance or usability, our specially designed marine engines also help preserve the environment through the use of pioneering clean-burn technologies.

Latest-generation engine design

These engines are very compact and efficient, with twin cylinder, SOHC (Single Overhead Camshaft) configuration. The F9.9 now also has a stylish new compact design top cowling – in the style of our latest-generation engines – and features a longer stroke, to give an extra 8% engine capacity. The result is more power and torque.

New tiller handle design and controls (F9.9)

A new ergonomic design approach has been adopted for the tiller handle and controls of the F9.9. The handle is a more convenient length and the shift lever is now positioned on the handle itself, within easy reach, for confident control.

Easier to carry and store (F9.9)

The F9.9 features new design refinements which make this tough, powerful engine even handier to use. The steering bracket now has a bigger, more comfortable carrying handle built in and we've made storage easier too – choose the vertical position, using the special new rest-pad, or if you prefer, you can also lay the engine on its side.

CDI Micro-computer Ignition system

Because you want the fun to start as soon as you get on to the water, Yamaha ignition systems are constructed from solid state components. With no moving parts, they deliver reliable starting and consistent performance time after time – characteristics that every Yamaha outboard shares.

Shallow Water Drive system

Cruise towards the shore with confidence thanks to Yamaha's Shallow Water Drive system. Offering ample protection for your propeller, it allows you to get as close as you need to be, no matter whether you're cruising a murky lake or the crystal clear shallows of the sea.

Yamaha's Ideal Anti-corrosion Protection

You need an engine you can rely on and Yamaha outboards are renowned for their durability – which also means they hold their value. While a unique YDC-30 aluminium alloy protects the engine's exterior parts, a zinc coating, high-quality stainless steel, and 5-stage exterior coating offer long-lasting protection – inside and out.

Engine

Engine type	4-stroke	4-stroke
Displacement	212 cm ³	197 cm ³
No. of cylinders/configuration	2/In-line, SOHC	2/In-line, SOHC
Bore x stroke	56.0 mm x 43.0 mm	56.0 mm x 40.0 mm
Prop shaft output at mid range	7.3kW / 5,500 rpm	5.9kW / 5,500 rpm
Full throttle operating range	5,000 - 6,000 rpm	5,000 - 6,000 rpm

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Marine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®. Yamalube® is our own range of high-tech lubricants, the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you drive.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative boating gear. An extensive range of casual wear is also available. For more information go to:
